I need to own the source code once finished.

(1) Here show in Cache / local storage the order we will be preparing in the following steps.

Once submitted in screen (4), clear this order.

(2) Here select one Client (field:CLCODI from our APIrest)
Writing the Client Number or selecting it from a pop up

(3) Before submitting the Order, display the Client and the Total amount of the Order.

Also display the client's account balance (same total as in (2))

And we need two notes areas.

SEND: Submit the Order to our API rest.

Once submitted clear this order from Screen 1.

Appart from submitting the date of the Order created, you will have to complete other fields in our JSON.
Some calculated and many others with a fixed value.
